

# THINK ZERO LLC, A WASTE REDUCTION ADVISORY FIRM

**HELPING COMPANIES MEET THEIR  
SUSTAINABILITY GOALS**

## THIS IS NO TIME TO WASTE

Customers and companies alike are paying more attention to reducing waste. Conscientious consumers want to send less to the landfills and devote more to businesses that align with environmental values. Concerned citizens want to conserve natural resources, protect our water from pollution, and keep heat-trapping emissions out of our air. And from a business perspective, meeting these demands makes sense: environment-friendly practices and products improve the bottom line by reducing costs, building customer loyalty, and engaging and inspiring employees. Given all that, it's no surprise that the most competitive businesses are looking for ways to prevent, reduce, and redirect waste across their value chain, from what they produce to what they consume.

**70% of consumers believe brand should be sustainable and 33% choose brands based on environmental and social impact**

## ABOUT THINK ZERO LLC

Think Zero LLC supports businesses in their waste reduction journey. Whether your company is concerned about compliance with local waste regulations, reducing and diverting waste in general, or has made a Zero Waste commitment, Think Zero helps set and accomplish your waste and materials management goals.

We are passionate about waste reduction and have deep expertise in waste management issues, being creative with solutions and partnering well with our clients. Our client engagements span a variety of topics from going plastic free, holding zero waste challenges, establishing a reusable or composting program, ensuring compliance with local rules, to creating plans to meet zero waste goals. Contact us to see how we can work together to help you meet your waste sustainability goals.
